YBI Foundation

Sep 2023 - Oct 2023

Python for Web Development

- Worked on Python basic, Various Models such as Cancer Prediction.
- Build some real world project.

Personal Projects

Quiz App

- https://github.com/Nikita-khadse/Quiz_app
- This quiz application will contain question followed by a total score with percentage shown at the end of quiz.
- Initially there are only five questions but we can increase questions in JavaScript file.
- I created the structure using HTML and design it with CSS, JavaScript will be used to implement the logic and scoring of the quiz.

Banking Website

- https://github.com/Nikita-khadse/Bank_management_system
- In Bank Management System, the user can perform all the tasks like creating an account, deposit amount, withdraw amount, check balance.
- In this project, I basically work on OOPs concept in C++ language.

Hotel Booking Website

- https://github.com/Nikita-khadse/Hotel_management_web
- This project is developed in which customer can check the facilities provided by the Hotel.
- There is gallery section to check the images of particular places of the Hotel.
- This responsive site project is simple and easy to operate by the users.

Achievements

Leetcode

https://leetcode.com/Nikita_khadse/
Problem Solved 250 +

- TCS ION Career Edge - Youth Professional course • Aug 2023
- Coding Ninjas : 250+ Solved
- CodeKaze : College Specific Rank - 6
